- DIRECTIONS FOR USE: Wash problem area and gently pat dry. Apply gel 2 to 3 times daily.
- FORMAT: 50 gram jar.

Keep out of reach of children.

DOCUMENTATION

Athlete's foot (tinea pedis) is a fungal infection of the skin between the toes. It may also appear on other parts of the body in the form of an itchy rash known as ringworm. Excessive perspiration due to poorly ventilated footwear invites infection. It can also be picked up in the changing rooms of public swimming pools or sports centers. (...) I suggest sunlight, fresh air and scrupulous hygiene, and to keep the feet as dry as possible. (Aromatherapy Massage with Essential Oils, Christine Wildwood, Element, 1991)

Tea tree, contained in the Mykessence formulation has been extensively researched using scientific methods with the following results: "This oil is unusual in that it is active against all three varieties of infectious organisms, bacteria, fungi and viruses." " It is a very powerful immuno-stimulant, so when the body is threatened by any one of these organisms, tea tree oil increases its ability to respond." (The Illustrated Encyclopedia of Essential Oils, Julia Lawless, Element, 1995)

DESCRIPTION OF THE INGREDIENTS AND THEIR PROPERTIES:

PALMAROSA (Cymbopogon martinii): antiseptic, bactericidal, cicatrizant (healing).

LEMONGRASS (Cymbopogon citratus): anti-microbial, antiseptic, bactericidal, astringent, fungicidal.

TEA TREE (Melaleuca alternifolia): anti-infectious, anti-inflammatory, antiseptic, bactericidal, cicatrizant (healing), fungicidal, parasiticide.

PATCHOULI (Pogostemon cablin): anti-inflammatory, anti-microbial, antiseptic, bactericidal, cicatrizant (healing), fungicidal.
